Copying the online patches from ZOOM Online

Drag the patch group and drop in the folder.

Troubleshooting

● **No sound or very little sound is output.**

· Confirm that the device and PC are connected via the USB cable.

· Properly connect the guitar to the INPUT terminal, and the headphone to the PHONE (or OUTPUT) terminal.

· Confirm that the shielded cable you are using works normally.

· To adjust the sound volume, turn the [PATCH LEVEL] knob in Edit&Share.

· Adjust the [Gain] parameter and [Level] parameter of the amplifiers and effectors used in Edit&Share.

· You can use the expression pedal to adjust the sound volume of certain patches. Adjust the pedal to achieve the appropriate sound volume.

· Adjust the master level of the device.

· Check the device settings.

● **Noise stands out.**

· Lower the [Gain] parameter and [Level] parameter of amplifier heads and drive effectors used in Edit&Share.
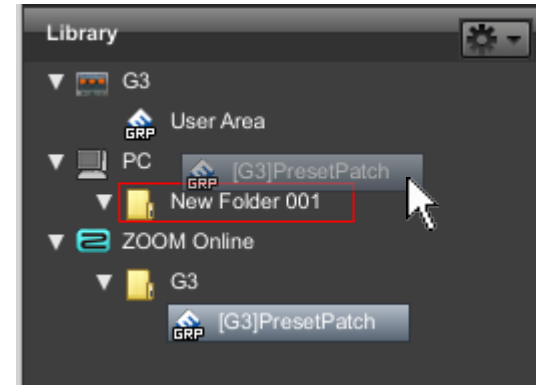

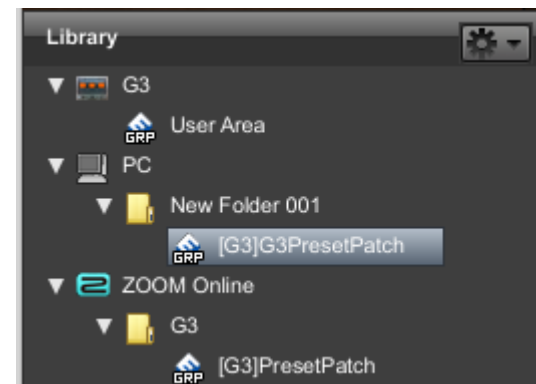

· Check the expression pedal settings. Depending on parameters assigned for the expression pedal, extreme changes to parameters caused by operating the pedal may result in noise.

· Make sure to check your peripheral equipment. Deteriorated, broken, or dirty connector terminals on the guitar or shielded cable may result in adverse performance.

● **The USB terminal is not recognized when it is connected to the PC.**

· Confirm that the OS supports the product.

● **The effector does not work.**

· Confirm that the effector is turned on (LED is lit.) Edit&Share screen.

· Check whether the device has been bypassed.

● **Device does not get recognized correctly**

· When the device list is inproper, click the [Device]-[Connect]-[Refresh] menu to update the list.

· If the name of the device does not appear, open the [Display] menu, select [Show Devices], and put a check next to the device name.

● **The device does not reply to Edit&Share while editing.**

· Please restart Edit&Share if you computer have turned into sleep mode.
   (Edit&Share does not support sleep mode. Please do not use sleep mode.)
