Operation manual

Usage and safety precautions

SAFETY PRECAUTIONS

In this manual, symbols are used to highlight warnings and cautions that you must read to prevent accidents. The meanings of these symbols are as follows:

⚠️ **Warning**	Something that could cause serious injury or death.
⚠️ **Caution**	Something that could cause injury or damage to the equipment.

Other symbols

❗	Required (mandatory) actions
🚫	Prohibited actions

⚠️ Warning

Operation using an AC adapter

❗ Use only a ZOOM AD-17 (sold separately) AC adapter with this unit.

🚫 Do not use do anything that could exceed the ratings of outlets and other electrical wiring equipment. Before using the equipment in a foreign country or other region where the electrical voltage differs from that indicated on the AC adapter, always consult with a shop that carries ZOOM products beforehand and use the appropriate AC adapter.

Operation using batteries

❗ Use 2 conventional 1.5-volt AA batteries (alkaline or nickel-metal hydride).

❗ Read battery warning labels carefully.

❗ Always close the battery compartment cover when using the unit.

Alterations

🚫 Never open the case or attempt to modify the product.

⚠️ Precautions

Product handling

❗ Do not drop, bump or apply excessive force to the unit.

❗ Be careful not to allow foreign objects or liquids to enter the unit.

Operating environment

🚫 Do not use in extremely high or low temperatures.

🚫 Do not use near heaters, stoves and other heat sources.

🚫 Do not use in very high humidity or near splashing water.

🚫 Do not use in places with excessive vibrations.

🚫 Do not use in places with excessive dust or sand.

AC adapter handling

❗ When disconnecting the AC adapter from an outlet, always pull the body of the adapter itself.

❗ During lightning storms or when not using the unit for a long time, disconnect the power plug from the AC outlet.

Battery handling

❗ Install the batteries with the correct +/- orientation.

❗ Use a specified battery type. Do not mix new and old batteries or different brands or types at the same time. When not using the unit for an extended period of time, remove the batteries from the unit.

❗ If a battery leak should occur, wipe the battery compartment and the battery terminals carefully to remove all battery residue.

Connecting cables with input and output jacks

❗ Always turn the power OFF for all equipment before connecting any cables.

❗ Always disconnect all connection cables and the AC adapter before moving the unit.

Volume

🚫 Do not use the product at a loud volume for a long time.

Usage Precautions

Interference with other electrical equipment

In consideration of safety, the *H2n* has been designed to minimize the emission of electromagnetic radiation from the device and to minimize external electromagnetic interference. However, equipment that is very susceptible to interference or that emits powerful electromagnetic waves could result in interference if placed nearby. If this occurs, place the *H2n* and the other device farther apart. With any type of electronic device that uses digital control, including the *H2n*, electromagnetic interference could cause malfunction, corrupt or destroy data and result in other unexpected trouble. Always use caution.

Cleaning

Use a soft cloth to clean the panels of the unit if they become dirty. If necessary, use a damp cloth that have been wrung out well. Never use abrasive cleansers, wax or solvents, including alcohol, benzene and paint thinner.

Malfunction

If the unit becomes broken or malfunctions, immediately disconnect the AC adapter, turn the power OFF and disconnect other cables. Contact the store where you bought the unit or ZOOM service with the following information: product model, serial number and specific symptoms of failure or malfunction, along with your name, address and telephone number.

Copyrights

Introduction

Thank you very much for purchasing a ZOOM *H2n* Handy Recorder.
The features of the *H2n* include the following.

• Four-channel recording captures sound in 360°
The built in microphones are divided into mid-side (MS) mics on the rear side and XY mics on the front side. This independent placement allows you to record sound coming from every direction. This unrestricted range means you can record diverse sound sources in all kinds of conditions.

• New microphone array allows control of stereo width
The MS mic includes a directional mid mic that covers the front and a bidirectional side mic that covers both sides. By controlling the amount of side mic signal, you can freely adjust the stereo width of recordings.

• Stereo recording is clear and three-dimensional
Using the XY mic, you can realize three-dimensional stereo recordings that faithfully capture a sense of depth.

• Uninterrupted long recordings possible at high-quality
Recording is possible without interruption for very long times. You can even fill an entire 32GB SDHC card in one session!

• Runs for a long time on standard batteries
You can record for up to 20 hours (44.1kHz/16bit WAV format) with one set of alkaline batteries. So, even in situations where you must rely on batteries, you can keep recording without worrying about the time.

• Use as an SD card reader and computer audio interface
The built-in USB 2.0 high-speed port allows direct connection with a computer. Use the recorder as an SD card reader with a computer to transfer recordings to your computer for use in DAW software or to burn them to CDs. You can even use the recorder as a computer audio interface at USB 1.0 speed.

• Tuner, metronome and other practice features
In addition to standard chromatic tuning, the tuner also supports seven-string guitar, five-string bass and alternate tunings. The convenient metronome can even provide a count in and the speed and pitch of playback can be adjusted, making it a useful practice companion.

Please read this manual carefully to fully understand the *H2n* so that you can maximize your use of its features. After reading the manual once, please keep it with the warranty in a safe place.

Turning the power ON and OFF

Turning the power ON

● Slide ▯ down.

Turning the power OFF

● Slide ▯ down and hold it until "Goodbye

see you!" appears on the screen.

Using the hold function

In order to prevent accidental operation during recording, the *H2n* has a hold function that disables the use of controls other than the MIC GAIN.

Enabling the hold function

● Slide ▯ up to the HOLD position.

NOTE
Even when the hold function is on, the remote control (sold separately) can still be used.

Disabling the hold function

● Slide ▯ back to the middle.

Connecting an external mic

1. Connect an external mic (sold separately) to the *H2n* LINE IN jack.

NOTE
· An external mic can be used instead of the XY stereo mic.
· An external mic cannot be used with MS Stereo mode.

Using plug-in power

Make the following setting before connecting a mic that requires plug-in power.

1. Press ⓪ .

2. Use ⬆⬇ to select INPUT, and then

press → .

> MENU
> FOLDER
> FILE
> **INPUT**
> REC

3. Use ⬆⬇ to select PLUG-IN POWER,

and then press → .

19

Recording mode overview

The **H2n** has four recording modes that can be selected according to your purposes.

Mid-side (MS) stereo mode ⊗MS

This mode uses a mid mic to capture the sound directly ahead and a bidirectional side mic to capture sound from left and right.

The recording level of the side mic (S level) can be adjusted, allowing the stereo width to be changed. If you record with the S level set to MS-RAW, you can also adjust the S level after recording.

MS mics can capture a rich stereo image, so it is ideal for recording sounds in wide and open conditions, including orchestras, live concerts and soundscapes.

XY stereo mode ⊗XY

This mode records in stereo with mics at 90º angles. This allows a natural, deep and accurate sound image to be captured, making it optimal for recording sources nearby, including solo performances, chamber music, interviews, live rehearsals and field recordings.

2ch and 4ch surround modes ⊗ ⊗
2ch 4ch

Sound can be captured in all directions using both MS and XY mics.

You can select 2ch, which mixes the signals from the MS and XY mics, or 4ch, which records the signals from the MS and XY mics separately. With 4ch surround, you can adjust the balance between the MS and XY signals after recording. The S level can be adjusted for both 2ch and 4ch recordings.

These modes are suitable for recording live rehearsals, studio sessions, business meetings and soundscapes, for example.

Selecting the recording mode

1. Turn so that the triangle points to the desired mode.

NOTE

· The 4ch surround mode can only be used when an SD card is in the unit.
· In 4ch surround mode, only WAV formats (44.1/48kHz, 16/24bit) can be used.
· In 4ch surround mode, two stereo files are created (MS mic recording and XY mic recording).

2. Make settings for the recording mode.

Adjusting the S level (MS stereo, 2ch/4ch surround modes)

You can adjust the stereo width (S level) before recording.

● Use to adjust the stereo width.

Wide   The graphic changes along with the value   Narrow

NOTE

Set to OFF, RAW or between –24 and +6 dB.

22

Using MS-RAW mode (WAV format only)

If you want to adjust the stereo width after recording, record using MS-RAW mode.

● Hold down until RAW appears.

Selecting where recordings are saved

1. Press .

2. Use to select FOLDER, and then press → .

3. Use to select the folder where you want to save files, and then press → .

NOTE

Select from among 10 folders. There are separate sets of folders for stereo and 4ch recordings.

23

Recording manually

HINT

· Adjust the MIC GAIN so that the peak level stays around -12 dB.
· If an input signal is too strong, the MS/XY indicator on the top will flash immediately.
· The recorder can also adjust mic gain automatically. (→ P.70)
· You can change the recording format beforehand. (→ P.72)
· The mic can also be set to cut wind and other unwanted noise. (→ P.66)

2. Press ● to start recording.

3. Press → PLAY to add a mark.

4. Press ● to stop recording.

NOTE

· One file can have a maximum of 99 marks.
· The mic can also be set to pause immediately after adding a mark. (→ P.77)
· During recording, if the size of the file exceeds 2 GB, recording will continue in a new file that will be created automatically.

1. Turn (MIC GAIN) to adjust the input level.

Recording automatically

The mic can be set to start and stop recording automatically in response to changes in the input level.

1. Press ⓞ MENU.

2. Use ⬆⬇ to select REC, and then press →.

```

NOTE
PRE COUNT cannot be used at the same time as PRE REC.

29

Playing back recordings

You can play files in the current folder. Change the folder to play files in a different folder.

1. Press → PLAY .

Use PLAY to jump between marks and files

Hold PLAY to search forward or backward

Press → PLAY to pause and restart playback

Use VOLUME + − to adjust the volume

HINT

The longer you hold the PLAY control the faster it will search in that direction.
2. Press and hold MENU ⓪ to return to the home screen.

Selecting the file to playback from a list

You can select a file in the current folder for playback. Change the folder to select files from a different folder.

1. When the playback screen is open, press (0) .

2. Use ↕ to select FILE LIST, and then

press → .

3. Use ↕ to select a file, and then press

→ to start playback of that file.

NOTE

After a file plays once, playback will stop or continue according to the PLAY MODE setting.

4. Press and hold (0) to return to the home screen.

Changing the playback speed

You can change the playback speed to between 50% and 150% of normal speed.

1. When the playback screen is open, press (0) .

2. Use ↕ to select SPEED, and then

press → .

3. Use ↕ to set the playback speed, and then

press → .

Files will be played at the set speed.

NOTE

The set value will be saved even when the power is turned OFF.

Loop playback of a set interval (AB REPEAT)

You can loop playback between two set points. Select the file that you want to play back first.
1. When the playback screen is open, press $\overset{MENU}{(0)}$.

2. Use the wheel to select AB REPEAT, and then press .

> ▶PLAY **ZOOM0001.WAV**
> FILE LIST
> EDIT
> **AB REPEAT**

Exchanging files with a computer (Card reader)

You can connect the recorder to a computer to check and copy data on the SD card.

**1.** After turning the power on, connect the *H2n* to a computer by a USB cable.

> **NOTE**
> · To run the *H2n* using USB bus power, connect it to a computer by USB while the power is OFF.
> · The *H2n* is compatible with the following operating systems.
> Windows XP, Windows Vista, Windows 7, Macintosh OS X (10.2 or later)

2. Press ⓪.

3. Use to select USB, and then press → .

4. Use to select SD CARD READER, and then press → .

The SD card will appear on the computer as a connected drive where you can check the files on it.

5. Unmount the card from the computer before disconnecting the recorder.

Windows: Use "Safely Remove Hardware" to select the *H2n*

Mac: Drag and drop the *H2n* icon into the Trash

> **NOTE**
> Always follow the proper procedures on your computer to unmount the *H2n* SD card before disconnecting the USB cable.

6. Disconnect the cable from the computer and the *H2n*, and then press ⓪.

Audio interface use | MS/XY stereo and 2ch surround modes only
You can record the signal from the *H2n* directly to a computer, and output the playback signal from a computer through the *H2n*.

**1.** Follow steps 1–3 in "Exchanging files with a computer" on P.58.

2. Use to select AUDIO I/F, and then

press .

> **USB**
> SD CARD READER
> AUDIO I/F

3. Use to select SAMPLING FREQUENCY,

and then press .

> **USB AUDIO I/F**
> SAMPLING FREQUENCY
> CONNECT
>
> 44.1kHz

4. Use to select the sampling frequency,

and then press .

> **SAMPLING FREQUENCY**
> 44.1kHz
> 48kHz
>
> CANCEL:MENU

NOTE

Make sure that the sampling frequency settings are the same for both the *H2n* and the software you are using.

5. Use to select CONNECT, and then

press .

> **USB AUDIO I/F**
> SAMPLING FREQUENCY
> CONNECT

NOTE

· For information about the menu items that can be used see the following.

LO CUT (→P.66)	PLUG-IN POWER (→P.16)	AUTO GAIN (→P.70)
COMP/LIMITER (→P.68)	MONITOR (→P.67)	DISCONNECT
MS-RAW MONITOR (→P.71)	TUNER (→P.62)	INPUT

· If you want to send signals from the recorder to the computer, set INPUT to ON in the USB AUDIO MENU.

6. To disconnect the recorder, press , use

to select DISCONNECT, and then press .

> **USB AUDIO MENU**
> MONITOR
> INPUT
> AUTO GAIN
> DISCONNECT

7. Use to select YES, and then press .

Updating the system software

You can update the system software used by your *H2n* to the latest version.

1. Copy the updater file to the root directory of the SD card.

> **NOTE**
> Download the latest system software at the ZOOM
> website (http://www.zoom.co.jp).

2. With the SD card in the *H2n*, turn the power

ON while pressing and holding →▤ .

3. Use ↕▤ to select OK, and then press →▤ .

VERSION UPDATE
SYSTEM:1.00=>1.10
BOOT :1.00

[OK] [CANCEL]

4. After updating completes, turn the power OFF.

VERSION UPDATE
COMPLETE!
Please Power Off

> **NOTE**
> You cannot update the system software if the battery
> charge is low. In such a case, install new batteries or
> use an AC adapter (sold separately).

Using SD cards from older H series recorders

This recorder can read SD cards that have been used in older H series recorders
and copy their files into folders for use by the *H2n*.

1. With the SD card inserted, turn the power ON.

2. Use ↕▤ to select YES, and then press →▤ .

FILE MOVE
Move H2 files
to H2n folder?
YES
NO
CANCEL:MENU

> **NOTE**
> A file must be renamed before moving if another
> file with the same name already exists in the *H2n*
> folder.

Using a remote control

By using a remote control (sold separately) you can operate the *H2n* from a distance.

● Connect the remote control to the REMOTE jack on the *H2n*.

The functions of the buttons on the remote are as follows.

Add marks (WAV format only)

Start and stop recording

Lights during recording

Pause (resume) recording

Troubleshooting

If you think that the *H2n* is not operating properly, please check the following first.

Recording/playback trouble

◆ **There is no sound or output is very quiet**
· Check the connections to your monitoring system and its volume setting.
· Confirm that the volume of the *H2n* is not too low.

◆ **The recorded sound cannot be heard or is very quiet**
· If you are using built-in mics, confirm that the active mics are oriented correctly and that the recording mode is suitable. (→ P.20)
· Check the MIC GAIN setting. (→ P.24, 70)
· If you are recording from a CD player or other device connected to the LINE IN jack, raise the output level of the connected device.

◆ **Recording is not possible**
· Confirm that the SD card has open space. (→ P.82)
· If "Hold" appears on the display, the hold function is enabled. Disable the hold function. (→ P.15)

Other trouble

◆ **The recorder is not recognized by a computer when connected by USB**
· Check that the OS of the computer is compatible. (→ P.58)
· The *H2n* operation mode must be selected on the recorder before it will be recognized by a computer. (→ P.58)

Specifications

Recording media	16MB–2GB SD cards, 4GB–32GB SDHC cards (Cards that can be used with this recorder are to be verified individually)	
Built-in memory	Can be used to record up to 1 minute in 96 kbps MP3 format (recording to this memory overwrites any previous recording in it)	
Recording	Mic arrangements	MS stereo with adjustable side mic level 90° XY stereo
	Modes	MS, XY, MS+XY (stereo) and MS+XY (4ch)
Microphones	Types	Directional (XY, MS mid mics) Bidirectional (MS side mic)
	Maximum sound pressure input	120 dB spl (directional) 122 dB spl (bidirectional)
File formats	Stereo	
	Uncompressed PCM	44.1/48/96kHz, 16/24bit WAV (BWF)
	Compressed MP3 (recording)	44.1kHz, 48/56/64/80/96/112/128/160/192/224/256/320kbps (Not compatible with MS-RAW recording)
	Compressed MP3 (playback)	44.1/48kHz, 32/40/48/56/64/80/96/112/128/160/192/224/256/320kbps
	4ch	
	Uncompressed PCM	44.1/48kHz, 16/24bit WAV (BWF) Two stereo files for each recording
Digital processing	A/D conversion	24-bit 128× oversampling
	D/A conversion	24-bit 128× oversampling
	Signal processing	32-bit
Recording time	2GB card example	3:08:00 (44.1kHz/16bit WAV) 34:43:00 (128kbps MP3)
Features	LO CUT	80Hz high-pass filter
	COMP/LIMITER	3 types of compressors and 3 types of limiters
	AUTO GAIN	Automatic input gain adjustment
	PRE REC	2 seconds of pre-recording
	AUTO REC	Automatic recording start/stop, continuous standby
	TUNER	Chromatic, guitar, bass and alternate (A/E/G/D/DADGAD) tunings with automatic string detection
	METRONOME	40–250 BPM range, five tones, pre-count
	SPEED	Playback speed adjustable between 50–150%

Features	KEY CONTROL	Playback pitch adjustable ±6 semitones (cannot be used with 96kHz files)
	AB REPEAT	Repeats playback between selected points in a file
	FILE DIVIDE	Divides a file into two
	FILE NORMALIZE	Maximizes file volume (cannot be used with MP3s)
	FILE MP3 ENCODE	WAV files can be converted to MP3 formats at fixed bit rates
	MARK	Up to 99 marks can be added as desired when recording WAV files
	SURROUND MIXER	Mix balance can be adjusted when playing back 4ch surround recordings
Display	Graphic LCD (128×64 pixels) with backlight	
Input gain	0 to +39 dB	
Input jack	Line/mic stereo mini jack can supply plug-in power 2 kΩ impedance at input levels of 0 to –39 dBm	
Output jack	Line/headphone stereo mini jack Rated output level: –10 dBm (output impedance 10 kΩ or more) Headphones: 20 mW + 20 mW (into 32 Ω load)	
Built-in speaker	400mW, 8Ω, mono	
USB	Mini-B type Card reader operation USB 2.0 High Speed Audio interface operation USB 1.0 Full Speed Supports 44.1/48kHz sampling rates and 16-bit rate Bus power operation supported	
Power	AD-17 USB to AC adapter (DC 5V 1A), operates using two AA batteries Continuous operation of 20 or more hours when recording 44.1kHz/16-bit WAV files using alkaline batteries	
Physical features	Tripod mounting socket, strap attachment Dimensions (mm): 67.6 (W) × 113.85 (H) × 42.7 (D) Weight: 130 g (without batteries)	
Included accessories	Operation manual, SD card (2GB), 2 AA batteries, WaveLab LE Download access code sheet	

* Recording concerts and public performances, for example, without permission from rights holders is prohibited by law.
* Product specifications and appearance might be changed for the purpose of improvement without warning.
* 0 dBm = 0.775 Vrms

FCC regulation warning (for U.S.A.)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.
